The experience of thousands daily proves that no preparation of Iron can be codinared with it. Imparities of the blood, depression of vital energy, pale & otherwise sighty complexions indicate its necessity in atmost every conceivable case.

In Scredular Teberralests, this medicated iron has had far more than the good effect of the most cautiously belanced preparations of lodine, without any of their well known liabilities. In Intermitting Feners it must necessarily be a great remedy and energatic restorative, and its progress in the new settlements of the West will probably be one of high renown and usefulness.
